

Global Data Backup

Most small businesses don't have a backup plan that fully protects them. Don't become a statistic! Let us help you protect your most valuable asset, your computer data! Why all the fuss about backup? Chances are you have a lot of important stuff on your computer like financial documents, email, digital photos, music and more. Unfortunately, computers are vulnerable to hard drive crashes, virus attacks, theft and natural disasters, which can erase everything in an instant.

Current statistics show that one in every ten hard drives fail each year. The cost of recovering a failed hard drive can exceed \$7,500, and success is never guaranteed. Insurance for your data. Global Data Backup is a simple and safe way to back up all the important stuff on your computer. A copy of your data is stored in various secure, remote location for safekeeping, so that in the event of disaster your data is still retrievable.

What makes Global Data so great? Global Data makes online backup possible for everyone with an affordable, secure solution that's easy to use. Don't just take our word for it. Check out the testimonials to see all the great reviews that we have received.
