Online Demonstrations On Demand

The first four movies walk you step-by-step through installing the Evaluation software, configuring your RBS Server, testing your RBS Server, and building a Client installer that you can install on any computer. We recommend viewing them before installing the Evaluation software.

Installing and Running the Evaluation Software (10:20)

- Install the Evaluation Software
- Select files for Backup
- Run a Backup
- Restore Files

Configuring the RBS Server for the Internet (6:40)

- The RBS Manager Properties Screen
- Configure the RBS Server for the Internet
- Set the Command Port
- Set the Data Ports

Using the Online Server Tester (6:40)

- Test your RBS Server before Installing Client Software
- IP Addresses
- Routers and Firewalls

Building an RBackup Client Installer (7:10)

- Customize your Client installer
- Set up your Client Installer to Operate on the Internet
- Create a Client Installer as a Self-Extracting Installer (EXE File)
